

Constant Voltage LED Power Supply Phasecut Dimmable SLD120-24VL-E

Phasecut Dimmable

Product description:

This type of dimmable power supply is an exclusively designed stabilized power supply for LED lamp. With constant voltage (CV) technology, it is suitable for constant voltage lamps(24Vdc) connected in parallel. The output current of the converter could be dimmed between 5%-100% by trailing or leading edge dimmers.

The built-in protection circuit will shut down the power supply in case of such faults as: open circuit, short circuit, over load and over temperature. The power supply will restart automatically after fault correction.

Standards:

Note

- [1]: Measurement precision for output power +/- 10%.
 - [2]: Tolerance: includes set up tolerance, line regulation and load regulation.
 - [3]: Tested at ripple peak value of 100Hz/120Hz.
 - [4]: The dimming range varies according to the test without dimmer.
 - [5]: Tested at full load, 230Vac. Refer to "Power Factor" and "EFFICIENT" curve graphs.
Minimum power factor is rated value - 0.05.
 - [6]: Calculate the model's average efficiency for each test voltage by testing at 100%, 75%, 50%, and 25% of rated current and then computing the simple arithmetic average of these four values.
 - [7]: Life-time with dimmer is dependent to the difference dimmer.
- All parameters NOT specially mentioned are measured at nominal voltage input, rated load and 25 of ambient temperature.
The power supply is considered as a component that will be operated in combination with final equipment.
Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
