#### Product description:

This type of dimmable power supply is an exclusively designed stabilized power supply for LED lamp. With constant voltage (CV) technology, it is suitable for constant voltage lamps(24Vdc) connected in parallel. The output current of the converter could be dimmed between 5%-100% by trailing or leading edge dimmers.

The built-in protection circuit will shut down the power supply in case of such faults as: open circuit, short circuit, over load and over temperature. The power supply will restart automatically after fault correction.

#### Standards:

- EN61347-1
- EN61347-2-13
- EN61547
- EN55015
- EN61000-3-2
- EN61000-3-3
- EN62384
- EN62493
