

Constant Voltage LED Power Supply

SLT100-12VL-E

SLT100-24VL-E

Product description:

This type of power supply is an exclusively designed stabilized power supply for LED lamp. With constant voltage (CV) , it is suitable for constant voltage lamps (12/24V DC) connected in parallel lamps .

The built-in protection circuit will shut down the power supply in case of such faults as: open circuit, short circuit, over load and over temperature protection. The power supply will restart automatically after fault correction.

Note	1. Tolerance:includes set up tolerance, line regulation and load regulation. 2. Tested at full load,230Vac.Refer to "Power Factor" and "EFFICIENT"curve graphs. 3. Calculate the model's average efficiency for each test voltage by testing at 100%, 75%, 50%, and 25% of rated current and then computing the simple arithmetic erage of these four values. 4. All parameters NOT specially mentioned are measured at nominal voltage input, rated load and 25 of ambient temperature. 5. The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
